Introduction to Environmental Economics

Film Review Assignment

In “Poisoned Waters” (1 hr, 53 minutes), Pulitzer Prize-winning journalist Hedrick Smith examines the growing hazards to human health and the ecosystem. The complete video clip is available at

<http://www.pbs.org/wgbh/pages/frontline/poisonedwaters/view/>

Your assignment is to watch the video clip “Poisoned Waters” closely and write a review paper discussing concepts we are covering in the class that can be related to the context of this movie. The review paper should be in a typed write-up not more than 4 pages (double spaced with 12 font) size. To give you some directions, you can talk about Externality, Coase Theorem, Ecological vs. Neo-classical View of Sustainability, Costs and Benefits of Environmental Protection etc. and any other concepts that you can relate to its storyline.
